Congratulations on your decision to educate your children at home.

This pdf includes an affidavit and proposed list of objectives for both elementary and secondary students.

The affidavit includes all the required elements of the PA homeschool law and you may use it as is. Don't forget to sign in the presence of a notary.

The sample objectives may also be used as is but you could also use it as a guide to create your own. For example, if your secondary student will be studying Biology, you could replace the bullet points under "Science" with "Biology". If your student will be studying a foreign language or an advanced math, you could list that specifically.

Please keep in mind that specificity is not required in your list objectives. It's completely up to you. The objectives may not be rejected or used as a checklist to determine whether the home education program is in compliance.

I hope these forms are helpful. If you're feeling overwhelmed and confused by the information on the website, you might find my ebook helpful.

“Homeschooling in Pennsylvania: How to Comply with the Law in 8 Easy Steps” presents the information related to the legal filing requirements in a step-by-step format.

Enjoy the journey!

Beth Phillips
